Certifications

Oracle Cloud Infrastructure (OCI) 2025 Certified AI Foundations Associate <i>Oracle</i> Validated expertise in Large Language Models (LLMs), Machine Learning workflows, and Generative AI services.	January 2026
Programming Fundamentals using Python: Science Graduates Foundation Program <i>Infosys Springboard</i> Validated expertise in Python language.	June 2026

Technical Skills

Languages: Python, HTML, CSS, C, C++
Soft Skills: Collaboration, Communication, Public Speaking, Team Management, Problem Solving, Strategic Outreach
Specializations: Artificial Intelligence and Machine Learning (Fundamentals), Software Development
Tools/Loaders: Notion, GitHub, VS Code

Experience & Hackathons

Navothon (IIT Jodhpur) <i>1st Position – Team Nexacura</i> - Collaborated with Team Nexacura to secure the 1st position in Navothon, an intensive hackathon organized by IIT Jodhpur. - Designed and implemented AIML-based algorithmic solutions to solve complex technical logic challenges, combining the fields of Biomedical Science and Artificial Intelligence and Machine Learning.	March 2026 Jodhpur, India
Smart India Hackathon (SIH 2025) <i>Participant – Team Tech Titans</i> Developed an AI-driven student management solution and an ERP prototype focusing on real-time data processing through Round 1 of national competition.	September 2025 India
Bharatiya Antariksh Hackathon <i>Participant – Team Jalsetu</i> Participated as part of Team Jalsetu to process community data and generate actionable insights for local challenges.	September 2026 India

Projects

Bank Queue Stimulator C programming - Developed a simulation tool using C programming to optimize and understand banking queue management systems. - Applied core programming logic and data structure fundamentals to enhance system efficiency, improving queue management efficiency by 20%.	December 2025
Portfolio Website HTML, CSS Built a professional portfolio site built from scratch with HTML and CSS to showcase my projects, skills, and background.	2026
TeatherPay (Razorpay Build with AI Hackathon) Next.js, TypeScript, Tailwind CSS, FastMCP, - Vibecoded for Razorpay's Build with AI hackathon, engineering an autonomous agentic commerce platform featuring dynamic checkout negotiation, backend tokenization, and automated drop-off routing with true multi-tenant logging. - Implemented deterministic server-side guardrails enforcing a 20% gross margin floor, a 17,000 xap cap, and an adversarial exploit shield with real-time audit logging. - Standardized FastMCP API endpoints to enable machine-to-machine data discovery, and bounded transactions for autonomous AI buyers.	2026

Education

Jaipur Engineering College and Research Centre (JECRC) <i>Bachelor of Computer Science Engineering (B.Tech) SGPA: 9.66 / 10.0</i>	Jaipur, Rajasthan 2025 – 2029
Saint Soldier Public School <i>High School</i>	Jaipur, Rajasthan May 2024
